

Table of Contents

1	Introduction	1
1.1	Background	1
1.2	The Issues	4
1.3	Hypotheses	6
1.4	Objectives of the Study	7
1.5	Significance of the Study	7
1.6	Structure of the Thesis	8
2	Synopsis of Development Theories: The Significance of Agricultural Transformation and its Roles in the Dynamics of Economic Growth....	11
2.1	Agriculture in Historical Perspectives of Development Process	12
2.1.1	The Dualistic Model Argument	12
2.1.2	The Terms of Trade Argument	14
2.1.3	The Relative Importance Argument	14
2.2	The Role of Agriculture in Economic Development: Theoretical Framework of Intersectoral Linkages	16
2.2.1	Factor Market Linkages	16
2.2.2	Product Market Linkages	17
2.2.2.1	Food Market Linkages	17
2.2.2.2	Raw Materials Linkage	19
2.2.2.3	Demand Linkages for Products of the Non-agricultural Sector	19
2.2.2.4	Linkages in Foreign Exchange Earnings (A Comparative Advantage Approach)	20
2.2.3	Non-market Linkages	20
2.3	Accelerating Agricultural Growth: Precondition for Structural Transformation of an Economy	22
2.3.1	Agricultural Transformation: Concepts and Conditions	22
2.3.2	The Role of Resource Base and Efficient Price: Classical and Neo-classical Approach	23
2.3.3	Technical Progress or Productivity Growth: the Structuralist Approach	25
2.3.4	Policy and Institutional Change (Promoting Efficiency)	27
2.3.5	The Importance of Effective Demand on Agricultural Development	29
2.4	Does Investment in Agriculture Continue to Pay in the World of Globalization? Concepts and Arguments	31
2.5	Empirical Evidence	33

2.5.1	Important Development Histories of the Contemporary Developed Countries.....	33
2.5.2	Agricultural Growth and Economic Transformation in Countries Currently Undergoing Rapid Development.....	36
2.5.3	Agricultural Development in Sub-Saharan Africa: Failures and Progress	40
2.6	Conclusion	42
3	Review of Ethiopian Economic Development Policies, the Position of Agriculture in the Economy and the Challenges.	45
3.1	Outline of Economic Development Policies and Strategies and Problems	47
3.1.1	Pre-Reform Period (before 1991/92).....	47
3.1.2	Post-Reform Period: Outward-oriented and Rural-based (1991/92 onwards).....	50
3.1.2.1	Major Macroeconomic Policy Reforms Undertaken.....	50
3.1.2.2	The New Economic Development Strategy of the Current Government: Agricultural Development-Led Industrialization.....	52
3.1.2.3	Development Strategy for the Agricultural Sector.....	53
3.2	Government Expenditure on Agricultural Development Compared with the Industrial Sector.....	55
3.3	Assessment of the Performance and Contribution of Agriculture to the Economy in the Post-Reform Period.....	58
3.3.1	Growth and Relative Contribution of Agriculture to the Economy Whole.....	58
3.3.2	Changes in the Performance of Food Grain Supply after Economic Reform.....	61
3.3.3	Agriculture's Contribution to Exports and Changes in the Performance of the External Sector after the Economic Reforms.....	63
3.3.4	Contribution of Agriculture as a Supplier of Surpluses to other Sectors.....	66
3.3.4.1	Labor Supply and Challenges Relating to Changes in Labor Force Structure.....	66
3.3.4.2	Use of Raw Materials.....	68
3.4	Conclusion	70

4	Analysis of Dynamics in Sources of Agricultural Output Growth at Farm Household Level.....	73
4.1	Theory Relating to Sources of Output Growth and the Role of Institutions.....	73
4.1.1	Expansion or Intensification of Resource Use.....	74
4.1.2	Improving Efficiency.....	75
4.1.2.1	Allocative Efficiency.....	75
4.1.2.2	Technical Efficiency.....	76
4.1.3	Production Technology.....	77
4.2	Measuring Changes in Productivity and the Relative Contribution of Sources of Output Growth.....	78
4.2.1	Conventional Approaches and their Shortcomings.....	78
4.2.2	A Growth Decomposition Approach: Application of the Stochastic Frontier Production Function.....	80
4.2.2.1	Time-Varying Inefficiency Model.....	82
4.2.2.2	Empirical Application of the Frontier Model in Previous Studies.....	86
4.3	Research Design and Data Sources.....	88
4.3.1	Selection of the Study Areas.....	89
4.3.2	Physical Characteristics of the Study Areas.....	91
4.3.3	Selection of Production Lines.....	92
4.3.4	Sampling Design and Method of Data Collection.....	93
4.4	Statistical Description of Changes in Resource Endowment and Use.....	94
4.4.1	Livestock and Draft Power.....	94
4.4.2	Land Resources.....	97
4.4.3	Factor Market and Modern Input Use.....	98
4.4.3.1	Labor and Land Transactions.....	98
4.4.3.2	Improved Seed and Fertilizer Use.....	100
4.4.4	Relative Changes in Land Allocation to Major Crops.....	102
4.4.4.1	Statistical Method of Analysis.....	102
4.4.4.2	Results and Discussion.....	104
4.5	Analyses of Changes in Technological Progress, Technical Efficiency and Total Factor Productivity.....	106
4.5.1	Functional Form of the Stochastic Frontier Model and the Variables.....	106
4.5.2	Statistical Description of the Variables Entered in the Model.....	110
4.5.3	Empirical Estimations and Results.....	112
4.5.3.1	Hypotheses Tests.....	115
4.5.3.2	Changes in Output Elasticities and Technological Progress.....	117
4.5.3.3	Changes in Returns to Scale.....	122
4.5.3.4	Changes in Technical Efficiency.....	124

4.5.3.5	Changes in Total Factor Productivity and its Relative Contribution to Output Growth	127
4.5.4	Conclusion.....	132
5	Constraints to Technical Efficiency Improvement in Maize Producing Farmers.....	133
5.1	Theoretical Concept of Causes of Production Inefficiency	133
5.1.1	Internal Inefficiency Factors	133
5.1.2	External Inefficiency Factors	134
5.2	Determining Farm-Specific and Institutional Factors Limiting Technical Efficiency.....	135
5.2.1	Technical Inefficiency Effects Model	135
5.2.2	Variables and Hypothesis	136
5.2.3	Description of the Variables	138
5.2.4	Empirical Results.....	139
5.3	Conclusion	142
6	Market Liberalization, Price Instability and its Impacts on Modern Input Use and Food Production	143
6.1	Introduction	143
6.2	Market Liberalization and Food Self-sufficiency: The Challenges	144
6.2.1	The Free Market (“Pricist”) Approach	146
6.2.2	The Stabilization School	147
6.3	Trends in Prices, Modern Input Use and Food production	149
6.3.1	Trends in Prices of Modern Inputs and Cereal products	149
6.3.2	Trends in Modern Input Use	152
6.3.3	Performances and Trends in Cereal Food Production.....	154
6.4	Econometric Analysis of Output Price Volatility and its Impacts on Modern Input Use and Food Grain Supply	156
6.4.1	Estimating Volatility (Instability) in Grain Prices for Selected Cereals.....	157
6.4.1.1	The Model.....	157
6.4.1.2	Analysis and Results	158
6.4.2	Estimating the Impact of Price Instability on Modern Input Use and Food Grain Supply.....	160
6.4.2.1	Cointegration Tests	160
6.4.2.2	Variables Used in the Model	161
6.4.2.3	The Model and Estimation	163
6.4.2.4	Results	164
6.5	Conclusion	166

7	Summary, Conclusions and Policy Implications.....	169
7.1	Summary and Conclusions	169
7.2	Policy Implications.....	176
	Zusammenfassung	179
	References.	189
	Annex	201
