Chapter one: Introduction	19
1 Purpose	19
2 The Structure of the thesis	19
3 Background	22
4 Significance of the thesis: resources, institutions & theory	26
4.1 Why focus on elites and institutional change?	27
4.2 Theory	28
4.3 Why Uzbekistan and not Kyrgyzstan?	30
5 Methodology of the research	33
6 Constraining and enabling factors during fieldwork	35
6.1 Background material	35
6.2 Finance	36
6.3 Field visits	37
6.4 Language	41
Chapter two: Institutional change	43
1 Introduction	43
2 Institutional theory	45
2.1 Actor-oriented approach in institutional theory, political science, and organizational theory	45
2.2 Structure, habits, and institutional oriented approach	48
2.3 The functions of institutions	52
2.4 The outcome of the interaction of structures and actors	54
3 Institutional change	56
3.1 All institutions are equal, some institutions are more equal than others	57
3.2 Reasons for change	59
3.3 Introduction to the debate on institutional change	60

	3.3.1	Demand induced change – bottom-up change	62
	3.3.2	Supply induced changes: change from above and from outside	64
4		Institutional adaptive capacity: social capital and the role of elites	72
	4.1	Influences on institutional change: collective action and elites	72
	4.2	Influences on institutional change: adaptive capacity	75
	4.3	Institutions and elites	78
	4.4	Elites and demand induced institutional change: bottom-up	80
	4.5	Elites and supply induced institutional change: top-down	81
	4.6	Conclusions on elites and institutional change	83
5		Risk, elites and institutional change: relevance of risk theory	84
	5.1	Risk theories	85
	5.2	Risk and institutional change	85
6		Conclusion	87
Chapter three: From past to present, agriculture & politics in Uzbekistan			91
1		Introduction	91
2		The region	92
	2.1	The basin	92
	2.2	The Amu Darya	92
	2.3	The Khorezm province and the republic Karakalpakstan	99
3		Historical perspective	103
	3.1	Russia's policy of cotton production	103
	3.1.1	Changes of local water management	108
	3.2	The period of the Soviet Union prior to World War II	111
	3.2.1	Land reform and dekulakisation	111
	3.2.2	Collectivisation	112

3.2.3	The new elites	115
3.2.4	Tackling inefficiency?	118
3.4	The Soviet Union after World War II	119
3.4.1	The Soviet 'hydraulic mission'	119
3.4.2	Integrating the management of upstream & downstream flows	122
3.4.3	The Aral Sea crisis	123
3.4.4	Soviet elite recruitment: from ideology to skills	125
3.4.5	Forming a new elite	127
3.4.6	Elites and hierarchy	129
3.4.7	Elites and the patronage system	133
3.5	Uzbekistan since independence	136
3.5.1	Dis-integration: upstream versus downstream interests	136
3.5.2	Cotton and Society	137
3.5.3	Changing networks	138
3.5.4	Food security	140
3.5.5	Cotton versus rice	141
3.5.6	Irrigation management	143
3.5.7	Aral Sea disaster: Where are we now?	144
3.5.8	Environmental and population constraints in Central Asia	145
4	Conclusion	147
Chapter four: The local administrative level		149
1	Introduction	149
2	The first land reform	150
2.1	Background to the reform after independence	150
2.2	The influence of the local elite and district elite on land collection	154
2.3	Habits, institutions, and adaptive capacity	159
2.4	Outside influences, risk and adaptive capacity	161
2.5	Power beyond land allocation to independent farmers	162

	2.6	Summary of the first land reform	165
3		The second land reform	167
	3.1	Background to the establishment of water user associations in Uzbekistan	167
	3.2	Location of the evaluated water user associations	168
	3.3	Sizes of the water user association member farm	169
	3.4	Land allocation in the second reform	170
	3.5	Water user associations and farm organisations	172
	3.6	Top-down or bottom-up strategies for initiating a water user association	175
	3.7	Interest in establishing a water user association	177
	3.8	From state farm hydrotechnician to head of the water user association	178
	3.9	Training of water user association members	181
	3.10	Motivation and strategies to manipulate the risk situation	182
	3.11	Changing names without changing patterns of influence	184
	3.12	Anticipated new roles and responsibility of the state and collective farm managers	188
	3.13	Gate keepers of resources	189
		3.13.1 Information	189
		3.13.2 Water distribution within the water user association	191
	3.14	Habits and risk management	193
14		Conclusion	194
		Chapter five: The provincial level	197
	1	Introduction	197
	2	Organisational background	198
	3	Background to the fieldstudy	204
	4	The current role of the province manager of water distribution	207
	5	Motivation and strategy to manipulate the risk situation	210
	6	Anticipated new job and responsibility	213

7	Structures of planned support NGOs in Khorezm & Karakalpakstan	215
8	Gate keepers of resources	218
	8.1 Internal information	219
	8.2 External information	222
	8.3 Outside contacts	225
9	Positive/negative influence on changes	228
10	Different influences on the stakeholders	231
11	Competing interests of stakeholders at the same level	232
12	Supply and/or demand induced changes and the role of the provincial water elite	233
13	Conclusion	234
Chapter six: Conclusions		237
1	Findings	237
2	Discussion	239
	2.1 Politics and path dependency	239
	2.2 Changing the path	241
	2.3 Institutional change and the social optimum	241
	2.4 The importance of context	242
	2.5 Boundaries and exit opportunities	244
3	Recommendations: from theory to practice	244
	3.1 Support organisations and transparency	244
	3.2 Quality not quantity	245
	3.3 Not all constraints addressed	246
4	Summary	246
Bibliography		249
Appendix		261
