Figures	12
Tables	13
1. Introduction	17
1.1. Plan of the book	20
2. Social modernization and electoral change	25
2.1. Traditional cleavages and frozen party systems	26
2.1.1. The social-structural model of voting choice	27
2.1.2. The Michigan model	29
2.2. The sources of dealignment	32
2.2.1. The weakening of old cleavages and the rise of new issues	33
2.2.2. Cognitive mobilization	38
2.2.3. Partisan decline	41
2.2.4. The modernization of electoral campaigns	42
2.3. The consequences of dealignment	44
3. A cognitive approach to the voting decision process	47
3.1. Memory as an associative network	48
3.2. Political schemas	50
3.3. Political sophistication	51
3.3.1. Sophistication and the structure of belief systems	52
3.3.2. Sophistication, knowledge, and political schemas	56
3.3.3. The measurement of political sophistication	57
3.4. Information processing and the formation of attitudes	58
3.4.1. Dual-process models of opinion formation	59
3.4.2. Sophistication, heuristics, and motivation	61
3.4.3. Campaign intensity	64
3.5. Conclusion	65

4. The transformation of social-structural predispositions	67
4.1. Social change and political cleavages	68
4.2. The class cleavage	69
4.2.1. Defining and measuring social classes	69
4.2.2. The transformation of the class structure	72
4.2.3. The voting behavior of social classes	76
4.3. The religious cleavage	82
4.4. The overall impact of cleavages	86
4.4.1. Measuring the strength of cleavages	86
4.4.2. Evolution of cleavage strength in Germany	90
4.4.3. The transformation of cleavages in Switzerland	94
4.5. Party identification	96
4.6. Index of predisposition strength	101
4.7. Conclusion	105
5. The consequences of electoral change	107
5.1. Timing of the voting decision	108
5.2. Electoral volatility	110
5.2.1. The evolution of volatility in the German electorate	112
5.2.2. Electoral volatility in Switzerland	116
5.3. Split-ticket voting	117
5.4. Explaining electoral change	120
5.4.1. Hypotheses and operationalization	120
5.4.2. Cognitive mobilization and party identification	123
5.4.3. Volatility, time of decision, and split-ticket voting in Germany	124
5.4.4. Explaining the consequences of electoral change in Switzerland	132
5.5. Conclusion	139
6. The stability of attitudes	142
6.1. Selection of variables and baseline model	144
6.2. Analyzing attitude stability	152
6.3. The impact of expertise and predisposition strength on attitude stability	154
6.4. A multivariate analysis of attitude stability	162
6.5. Conclusion	166

7. The voting decision process	168
7.1. Model specification	169
7.2. The impact of attitude changes	171
7.3. Activation and conversion effects	175
7.4. Conclusion	182
8. Enlightened voters?	185
8.1. Model specification	186
8.2. Germany	187
8.3. Switzerland	195
8.4. Conclusion	198
9. Conclusion	201
9.1. How strong is electoral dealignment?	202
9.2. What explains the instability of party preferences?	204
9.3. The voting decision process	208
9.4. Some implications for future research	210
Appendix A	213
Description of data files	213
Measuring political expertise	215
Timing of the voting decision	218
Party identification	220
