

Contents

1	Introduction	13
1.1	The focus of this book	13
1.2	The puzzle of the directions of transitions	20
1.3	Past research	26
1.4	The theoretical synthesis	37
2	The economic constraints on regime changes – notes towards a coherent formalization	41
2.1	The structure of the argument	41
2.2	Preferences over institutions	48
2.3	Economic structure, sources of economic distortions, and integration into world markets	51
2.4	Summarizing the argument	59
3	Modeling transition	63
3.1	The focus of this chapter	63
3.2	The economy	64
3.3	The transition game	69
3.3.1	The basic set up	69
3.3.2	The sequential equilibria of the transition game	76
3.3.3	The comparative static	82
3.4	Implications	86
4	Research design	93
4.1	The Structure of this chapter	93

4.2	The operationalization of institutional alterations	93
4.3	Independent variables	101
4.4	The estimation technique: the ordered logistic regression model	114
5	Results	121
5.1	Measuring institutional alterations: dichotomous vs. rank ordered measures	121
5.2	Results of the ordered logistic regression model: first insights	126
5.3	The effect of integration on the prospects of democratization	137
5.4	Scrutinizing distinct regime types	149
5.5	Summarizing the findings	154
6	Conclusion	159
	Appendix	166
	References	190
