|                                                                             |           |
|-----------------------------------------------------------------------------|-----------|
| Index of Figures .....                                                      | 13        |
| Index of Tables .....                                                       | 17        |
| List of Abbreviations .....                                                 | 19        |
| <br>                                                                        |           |
| <b>1. Introduction .....</b>                                                | <b>21</b> |
| <br>                                                                        |           |
| <b>2. Literature Overview .....</b>                                         | <b>25</b> |
| 2.1 Theoretical background .....                                            | 25        |
| 2.1.1 Selection of a stream of theory .....                                 | 26        |
| 2.1.2 NEG models .....                                                      | 31        |
| 2.1.2.1 The basic Krugman model .....                                       | 31        |
| 2.1.2.2 Modifications to the Krugman model .....                            | 34        |
| 2.1.2.3 The model by Ludema & Wooton .....                                  | 37        |
| 2.1.2.4 The models by Krugman & Venables and by Puga .....                  | 43        |
| 2.2 Previous empirical studies .....                                        | 48        |
| 2.2.1 Industry agglomeration and concentration .....                        | 49        |
| 2.2.2 Industrial specialization of countries or regions .....               | 54        |
| 2.2.3 The effects of trade and the magnitude of trade costs .....           | 56        |
| 2.2.4 Foreign Direct Investment (FDI) and local labour markets .....        | 61        |
| 2.2.5 Studies on the CEECs and on Hungary .....                             | 62        |
| 2.3 The Europe agreement with Hungary .....                                 | 67        |
| 2.4 The hypotheses .....                                                    | 69        |
| 2.5 Data used for this research .....                                       | 71        |
| <br>                                                                        |           |
| <b>3. Main Characteristics of Hungary's Regions and Industries .....</b>    | <b>77</b> |
| 3.1 Introduction to Hungary and its geographic location .....               | 77        |
| 3.2 Macroeconomic developments in Hungary .....                             | 80        |
| 3.2.1 Overview of macroeconomic characteristics .....                       | 80        |
| 3.2.2 GDP growth in Hungary and other CEECs .....                           | 82        |
| 3.2.3 Main government policies with economic or regional implications ..... | 84        |
| 3.3 Hungary's regional set-up .....                                         | 85        |
| 3.4 Main economic indicators of Hungary's regions .....                     | 90        |
| 3.4.1 GDP .....                                                             | 92        |
| 3.4.2 Regional disparities in Hungary and other CEECs .....                 | 94        |
| 3.4.3 Employment and active enterprises at regional level .....             | 97        |
| 3.5 Influences on internal net migration per region .....                   | 100       |
| 3.5.1 Internal net migration per region .....                               | 101       |
| 3.5.2 Internal net migration and manufacturing wages .....                  | 106       |
| 3.5.3 Internal net migration and the housing market .....                   | 109       |

|           |                                                                               |            |
|-----------|-------------------------------------------------------------------------------|------------|
| 3.6       | The sectors of the manufacturing industry .....                               | 111        |
| 3.6.1     | Regional set-up of manufacturing in Hungary.....                              | 114        |
| 3.7       | Foreign trade developments .....                                              | 117        |
| 3.8       | Foreign direct investment in Hungary.....                                     | 123        |
| 3.9       | First conclusions with respect to the hypotheses.....                         | 127        |
| <b>4.</b> | <b>Manufacturing Industry Concentration in Hungary 1992 to 2008 ...</b>       | <b>131</b> |
| 4.1       | Measuring industry agglomeration.....                                         | 131        |
| 4.2       | Overview of indices.....                                                      | 132        |
| 4.3       | The Krugman concentration index .....                                         | 133        |
| 4.3.1     | Formula of the Krugman concentration index .....                              | 134        |
| 4.3.2     | Results of the Krugman concentration index.....                               | 134        |
| 4.3.3     | Comparison of the empirical results with NEG.....                             | 136        |
| 4.3.4     | Comparison of concentration ranks .....                                       | 138        |
| 4.3.5     | Comparison of the results with previous studies and for other countries ..... | 142        |
| 4.4       | Concentration rate $CR_3$ .....                                               | 143        |
| 4.4.1     | Formula of the $CR_3$ measure .....                                           | 143        |
| 4.4.2     | Results of the concentration rate $CR_3$ for Hungary .....                    | 144        |
| 4.4.3     | Regional composition of industry concentration $CR_3$ .....                   | 145        |
| 4.4.4     | Comparison of the results with theory .....                                   | 147        |
| 4.4.5     | Evaluation of the results by means of other empirical studies.....            | 147        |
| 4.5       | The Herfindahl index.....                                                     | 149        |
| 4.5.1     | Formula of the Herfindahl index.....                                          | 149        |
| 4.5.2     | Results of the Herfindahl index .....                                         | 150        |
| 4.5.3     | Comparison of the results with theory .....                                   | 151        |
| 4.6       | The relative Herfindahl index.....                                            | 152        |
| 4.6.1     | Formula of the relative Herfindahl index.....                                 | 152        |
| 4.6.2     | Results of the relative Herfindahl index for Hungary.....                     | 153        |
| 4.6.3     | Results of other empirical studies .....                                      | 155        |
| 4.7       | The Hoover-Balassa index .....                                                | 156        |
| 4.7.1     | Formula of the Hoover-Balassa index .....                                     | 156        |
| 4.7.2     | Results of the Hoover-Balassa index .....                                     | 157        |
| 4.7.3     | Comparison of the results with theory .....                                   | 158        |
| 4.7.4     | Evaluation in the light of other empirical studies .....                      | 158        |
| 4.8       | Entropy .....                                                                 | 159        |
| 4.8.1     | Formula of the entropy.....                                                   | 159        |
| 4.8.2     | Results of the entropy for Hungary.....                                       | 160        |
| 4.8.3     | Comparison of the results with theory and other empirical studies.....        | 163        |
| 4.9       | Comparison of concentration indices .....                                     | 164        |
| 4.9.1     | Comparison of results of the 6 concentration measures .....                   | 164        |

|           |                                                                                                         |            |
|-----------|---------------------------------------------------------------------------------------------------------|------------|
| 4.9.2     | Concentration indices in other empirical studies .....                                                  | 167        |
| 4.10      | Conclusions regarding industry concentration in Hungary and the<br>6 concentration indices .....        | 168        |
| <b>5.</b> | <b>Regional Specialization of the 20 Hungarian Regions .....</b>                                        | <b>171</b> |
| 5.1       | Review of previous empirical studies on specialization .....                                            | 171        |
| 5.2       | The Krugman specialization index .....                                                                  | 174        |
| 5.2.1     | Formula of the Krugman specialization index .....                                                       | 174        |
| 5.3       | Results for regional specialization in Hungary .....                                                    | 175        |
| 5.3.1     | Regional specialization .....                                                                           | 175        |
| 5.3.2     | Analysis of the turning point in regional specialization .....                                          | 177        |
| 5.4       | Analysis of the results by groups of regions .....                                                      | 179        |
| 5.4.1     | Specialization of Western regions versus Eastern regions .....                                          | 180        |
| 5.4.2     | Analysis of internal regions versus border regions .....                                                | 182        |
| 5.4.3     | Differentiation among different groups of border regions .....                                          | 183        |
| 5.5       | Analysis of the results in light of NEG theories .....                                                  | 185        |
| 5.6       | The results on regional specialization in light of previous studies .....                               | 187        |
| 5.7       | Conclusions regarding regional specialization .....                                                     | 188        |
| <b>6.</b> | <b>Econometric Analysis of Influences on Agglomeration and<br/>Regional Specialization .....</b>        | <b>191</b> |
| 6.1       | The question for regression 1 on agglomeration .....                                                    | 191        |
| 6.1.1     | Selection of independent variables and description of data .....                                        | 192        |
| 6.1.2     | Results of regression 1 - Agglomeration .....                                                           | 199        |
| 6.1.3     | Evaluation of the results in view of the hypothesis, NEG<br>models and previous empirical studies ..... | 201        |
| 6.2       | Regression 2 on regional specialization .....                                                           | 203        |
| 6.2.1     | Descriptive statistics and trend regression .....                                                       | 204        |
| 6.2.2     | Selection of independent variables and description of data .....                                        | 207        |
| 6.2.3     | Results of regression 2 - Regional specialization .....                                                 | 211        |
| 6.2.4     | Evaluation of results in view of the hypothesis, NEG models<br>and previous empirical studies .....     | 213        |
| <b>7.</b> | <b>Policy Implications for an Enlarged EU .....</b>                                                     | <b>217</b> |
| 7.1       | Review of the main empirical results .....                                                              | 217        |
| 7.2       | Policy implications .....                                                                               | 224        |
| 7.2.1     | Rationale for a European regional policy and role for<br>agglomerations and specialization .....        | 225        |
| 7.2.2     | Current challenges for regional policy in Hungary .....                                                 | 236        |
| 7.2.3     | Reforming regional policy after Eastern enlargement .....                                               | 242        |
| 7.3       | Conclusions, forecast for Hungary, and policy recommendations for<br>further EU enlargements .....      | 254        |
