List of figures	10
List of tables	11
List of abbreviations	13
1 Introduction	15
1.1 Motivation	15
1.2 Contribution and main findings	18
2 Relevance of decision makers in politics	21
2.1 Candidate characteristics and election outcomes	21
2.2 Decision maker characteristics and (policy) outcomes	24
2.2.1 Economic policy and economic growth	24
2.2.2 Monetary policy	24
2.2.3 Spending priorities and public good provision	26
2.2.4 Changes in the form of government	27
2.2.5 Corporate performance	27
2.3 Strength of the finance minister and fiscal policy	27
2.3.1 Theoretical considerations	28
2.3.2 Empirical evidence	28
3 Mayors in Bavarian municipalities	33
3.1 Introduction	33
3.2 Institutional setting and data	36
3.2.1 Politics and public finances at the local level in Germany	36
3.2.2 Description of our data set	37
3.3 Empirical model and methodology	40
3.3.1 Sharp regression discontinuity design	41

3.3.2	Fuzzy regression discontinuity design	44
3.4	Estimation results	45
3.4.1	Education and incumbency experience on electoral success	45
3.4.2	Education and incumbency experience on fiscal outcomes	48
3.4.3	Specific professions on fiscal outcomes	52
3.4.4	Validity of the regression discontinuity design	55
3.5	Conclusion	57
3.A	Appendix: Parametric and non-parametric implementation	58
3.B	Appendix: Figures and tables	61
4	Finance ministers in German states	71
4.1	Introduction	71
4.2	Institutional setting	73
4.2.1	Germany's federal design and political parties	73
4.2.2	Fiscal federalism in Germany	74
4.2.3	Budgeting procedures in Germany	76
4.3	Personality of the finance minister and public deficits in German states	76
4.3.1	Budgetary preferences of the finance minister	77
4.3.2	Ability of the finance minister	78
4.3.3	Traditional theories on budget deficits as control variables	80
4.4	Empirical analysis	81
4.4.1	Model specification	81
4.4.2	Description of the data set	82
4.4.3	Estimation methods	87
4.4.4	Estimation results	88
4.4.5	Robustness checks	94
4.5	Conclusion	97
4.A	Appendix	98

5 Finance ministers in Europe	101
5.1 Introduction	101
5.2 Public finances and the European finance ministers	103
5.2.1 Public finances and the finance minister's ability	104
5.2.2 Public finances and the finance minister's preferences	107
5.3 Data set and empirical model	109
5.3.1 Specification of the econometric model	109
5.3.2 Description of the data set	111
5.4 Results and robustness checks	116
5.4.1 Results related to the finance minister's ability	116
5.4.2 Results related to the finance minister's preferences	124
5.4.3 Robustness checks	125
5.5 Conclusion	128
5.A Appendix	130
6 Conclusion	137
6.1 Main results and contribution	138
6.2 Critical appraisal of different results and methods	141
6.2.1 Different results and fiscal institutions and attitudes	142
6.2.2 Different empirical methods	143
6.3 Policy implications	144
6.4 Further research	145
6.5 Concluding remarks	146
